

Name _____ Polygon Angle Sums Period _____ Date _____

Home plate on a baseball field has three right angles and two congruent angles. Find the measure of the two congruent angles.

The sum of the measures of seven angles of an octagon is 1000° . Find the measure of the eighth angle.

Name _____ Polygon Angle Sums Period _____ Date _____

Home plate on a baseball field has three right angles and two congruent angles. Find the measure of the two congruent angles.

The sum of the measures of seven angles of an octagon is 1000° . Find the measure of the eighth angle.

Find the number of sides of a polygon if the sum of the measures of its interior angles is twice the sum of the measures of its exterior angle.

In quadrilateral ABCD the measures of $\angle A$, $\angle B$, $\angle C$, and $\angle D$ are the ratio of 1:2:3:4, respectively. Find the measures of the four angles.

Find the number of sides of a polygon if the sum of the measures of its interior angles is twice the sum of the measures of its exterior angle.
